

Be our engineering talent of the future

Modern apprenticeships – Engineering Trainees

Air Products is a world-leading industrial gases company. Our 21,000 employees provide atmospheric and process gases and related equipment to manufacturing markets, including refining and petrochemical, metals, electronics, and food and beverage for customers around the globe. Our engineering excellence covers large process plants through to niche innovations.

We are looking for high potential, highly-motivated individuals to join our engineering and project execution teams working in various disciplines across the Design organisation, including Mechanical, Electrical, Civil/Structural, Piping, Procurement, Project Controls and Project Execution.

Educational requirements

- 5 GCSE's grade 4 or above (including mathematics/science)
- additionally, higher education such as A Levels (maths and/or physics preferred)/BTEC/National Certificate/HNC/D or other work-related engineering experience.

Benefits and rewards

Depending upon your experience and formal qualifications Air Products will develop your individual training plan. This may consist of on-the-job training and internal training to gain NVQ qualification or part-time day release for learning at a local college if appropriate.

Air Products will assist with college and examination fees and you can expect a competitive salary. There's also a comprehensive benefits package, including 26 days' annual holiday, pension scheme, fitness centre, sports and social club.

Application process

Please apply via our career centre at:
[airproducts.com > Careers > Search Job Openings](https://airproducts.com/careers/search-job-openings)
(search for JR-2025-14650 Engineering Trainee).

Successful applicants will be invited for an assessment at our European Head Office in Chertsey, UK on 10th July 2025.

Closing date for applications is Friday 2nd May 2025.
